Kaisong Huang kha85@sfu.ca https://kaisonghuang.github.io

Research Interests

I am broadly interested in data-intensive systems and work mainly on database engines, transaction processing, storage management, modern hardware and disaggregated systems. A major theme in my research is to build scalable data-intensive systems by fully exploiting modern hardware through carefully designed scheduling strategies.

Education

- **Simon Fraser University**, Metro Vancouver, BC, Canada
  Ph.D. in Computer Science 2020/09 – 2025/03 (Expected)
  – Committee: Tianzheng Wang (advisor), Zhengjie Miao, Dong Xie (external), Zhuoyue Zhao (external).
  – Thesis: Hiding and Reducing Latency in Modern Database Engines.

- **The University of Waterloo**, Canada
  M.Math in Computer Science 2018/09 – 2020/08

- **Nanjing University**, China
  B.Eng. in Software Engineering 2014/09 – 2018/06

Awards

- ACM SIGMOD Research Highlights Award, 2023
- Graduate Fellowship, Simon Fraser University, 2020, 2021, 2022, 2023, 2024
- Computing Science Travel Award, Simon Fraser University, 2022

Experience

- **Simon Fraser University** Metro Vancouver, BC
  Research Assistant, School of Computing Science 2020/09 – Present
  Advisor: Tianzheng Wang

  Teaching Assistant, School of Computing Science
  – CMPT 459/984: Modern Data Systems 2022/05 – 2022/08
  – CMPT 454: Database Systems II 2021/09 – 2021/12

- **Tencent Americas** Metro Vancouver, BC
  Database Kernel Research Intern, Tencent Cloud 2021/08 – 2021/10
  Applied coroutines to memory-optimized online transactional (OLTP) engines.

- **Telus** Greater Toronto Area, ON
  Co-op SDE Intern, Technology Strategy Team 2019/09 – 2020/01
  Automated the SD-WAN service provisioning using Nokia VSD and VMWare VCO.

- **The University of Waterloo** Waterloo, ON
  Research Assistant, Data Systems Group 2019/01 – 2019/08
  Advisor: Jimmy Lin
  Accelerated natural language processing against large documents using Spark.

- **SAP** Shanghai, China
  SDE Intern, Healthcare Team 2017/07 – 2018/02
  Developed patient accounting PoC applications on SAP Cloud Platform.

Artifacts

I have worked on the following systems that are being used by multiple research groups worldwide:

- **MosaicDB**, a memory-optimized OLTP database system for larger-than-memory workloads
  https://github.com/sfu-dis/mosaicdb
  Major contributor and maintainer.
- **CoroBase**, a coroutinized in-memory OLTP database system
  https://github.com/sfu-dis/corobase
  Major maintainer.
- **ERMIA**, a scalable OLTP database system for heterogeneous workloads
  https://github.com/sfu-dis/ermia
  Major maintainer.

  2023 ACM SIGMOD Research Highlight Award
  ACM SIGMOD International Conference on Management of Data (**SIGMOD**), 15 pages, 2022.
- Rethinking the Performance/Cost of Persistent Memory and SSDs.
  Kaisong Huang, Darien Imai, Tianzheng Wang, Dong Xie.
  Annual Non-Volatile Memories Workshop (**NVMW**), 2-page extended abstract, 2022.
  Invited for a full-length 20-minute oral presentation.

[1] Proceedings of VLDB and SIGMOD are the top two conferences for database systems. CIDR is the premier systems-oriented conference, complementary in its mission to the mainstream database conferences like SIGMOD and VLDB, emphasizing the systems architecture perspective.

  Kaisong Huang, Darien Imai, Tianzheng Wang, Dong Xie.
  The Conference on Innovative Data Systems Research (**CIDR**), 8 pages, 2022.

Talks

- Hiding and Reducing Latency in Modern Database Engines.
  – **Microsoft Research**, Redmond, WA, November 2024.
  – **State University of New York at Buffalo**, Buffalo, NY, November 2024.
  – **Penn State University**, State College, PA, December 2024.
- The Art of Latency Hiding in Modern Database Engines.
  – **VLDB**, Guangzhou, China, August 2024.
  – **Simon Fraser University** (systems group seminar), Burnaby, BC, April 2024.
  – **The Northwest Database Society**, Google, Kirkland, WA, February 2024.
- The Past, Present and Future of Indexing on Persistent Memory.
  – **VLDB**, Sydney, Australia, September 2022 (*90-minute tutorial*).
- Skeena: Efficient and Consistent Cross-Engine Transactions.
  – **Microsoft Research**, Redmond, WA, December 2022.
  – **SIGMOD**, Philadelphia, PA, June 2022.
- Rethinking the Performance/Cost of Persistent Memory and SSDs.
  – **NWDS**, San Diego, CA, May 2022

Professional Activities

- **Committee member**: The Conference on Information and Knowledge Management (CIKM) 2024; SIGMOD Availability 2022.
- **External reviewer**: CIKM 2023.
- **Journal reviewer**
  – The VLDB Journal
  – Journal of Systems Architecture
  – ACM Transactions on Architecture and Code Optimization (TACO)
  – IEEE Transactions on Computers (TC)
- **Student volunteer**: VLDB 2023, Vancouver, BC.
